WHAT THIS IS

This pack is taken from the account holder's own record: their own words, the messages as they were stored, and the files they kept. BuildMyEvidence has added the numbering, the dates and the references — nothing else. It has not written, summarized or changed a word of the record.

WHAT IS NOT IN IT

This pack leaves out the money, the account holder's own costs for this case and the account holder's own promises. Nothing has been deleted from the case: the full case file carries all of it.

The correspondence

Every message between the account holder and the other side that is on the record, both ways, in the order it happened, with the words it was stored with. Where a message was forwarded in, the account holder's forwarding note is left out, and an earlier message it quotes is noted rather than printed again. Messages that had nothing back are included: the silence is part of the record.

How this file was made

This file was assembled by BuildMyEvidence from a record kept by the account holder as events occurred. It is set out here so that anyone relying on it can see how it was made, and where its limits are.

TWO DATES	Every entry carries the date the account holder says it happened, which they set and can correct, and the date it was written down, which the application set and which cannot be altered by anyone, including BuildMyEvidence. Where a date was taken from a message or a file rather than typed, the entry says so.
FILES	Each attached photograph and document was fingerprinted (SHA-256) when it reached BuildMyEvidence — in the account holder's own browser, before it left their device, for a file they added; on arrival, for a file attached to an email. The fingerprints are printed below and beside the files at the appendices. A file altered afterwards would no longer match.
PHOTOGRAPHS	Where a JPEG photograph carried location data, it was removed on the way in, before the fingerprint was taken; other files were not inspected for it. What was found is stated beside each file. Where a file carries its own date inside it, that date is shown beside it.
DOCUMENTS	Where a PDF is reproduced, its pages were copied into this file without the document's own properties (who made it, with what and when), notes added on top of its pages, or the metadata inside any photograph in it. How much of each document is reproduced is stated beside it.
PAGES	Numbered straight through, attachments included, so any page in this file can be cited by its number alone.

How to check a file

A matching fingerprint shows a file has not changed since it reached us. It cannot show anything about the file before that — a phone often hands over its own copy of a photo rather than the one the camera made.

It also says nothing about whether this document is complete, and nothing about whether what the account holder wrote is accurate. It is a check on the bytes of the attached files, and only that.

This document cannot carry its own fingerprint — a file cannot contain a number worked out from itself. To check the document, ask the person who sent it for the fingerprint their copy shows, and compare the two lists below line by line.

1. Take any file supplied with this document.
2. Run shasum -a 256 on it, or use any SHA-256 tool.
3. Compare the result with the fingerprint listed against that file below.
4. If they match, that file has not changed since it was fingerprinted, on the date shown.

A fingerprint shows a file has not changed since it reached us. It cannot speak to anything before that.

WHAT BUILDMYEVIDENCE HAS NOT DONE

It has not checked any statement against any document, nor any figure against any account. It has applied no interest, calculated no penalty or late fee, and expressed no view on whether any amount is recoverable or any account of events is correct. It has given no advice. Every word and every figure in this file was entered by the account holder; BuildMyEvidence has recorded them, added and subtracted the amounts, and set them out in order.
